

7 YEAR WARRANTY AGAINST DELAMINATION

DSG Industri A/S offers a 7-year warranty against delamination and discoloration on tempered laminated glass produced with our EVA foil, without additional costs.

The warranty runs from the first delivery date and 7 years onwards and is valid upon presentation of order confirmation stating the delamination warranty.

The warranty only covers delivery of new glass and only the glass that may be affected by delamination or discoloration.

The delamination is considered to be from 2mm inwards of the glass measured from the edge. The same is applicable to holes.

The warranty only applies if the glass upon receipt is handled and installed according to the Danish Glass Industry's guidelines. Delamination is defined according to the guidelines of the Danish Glass Industry as well as the allowed standards for irregularities.

The guarantee is also valid when the glass is exposed with free-standing edges.
